**About e-therapeutics plc**

e-therapeutics plc is an Oxford, UK-based company integrating computational power and biology to accelerate the discovery of life-transforming medicines. The Company has developed and validated a powerful, disease and modality agnostic computational approach to drug discovery, leveraging its industry-leading expertise in network biology to fully capture and interrogate human disease complexity.

The Company's multi-disciplinary team builds computational models of biological functions to transform the search for new medicines, interventions, mechanisms and genetic support. Its biology-led *in silico* laboratory enables rapid hypothesis generation and phenotypic screening of millions of compounds leading to 100-1000x higher hit rates in the wet lab and successful mode of action elucidation. Novel targets can also be identified, prioritised and assessed. Harnessing internal target gene discoveries, e-therapeutics is currently building an in-house pipeline of RNAi based medicines, using its proprietary GalNAc-siRNA technology.

e-therapeutics has deployed and validated its disease-agnostic computational drug discovery platform both in house and with partners, including Novo Nordisk, Galapagos NV and a US-based, top 5 pharmaceutical company.
